

**Colerne C of E - Belong**

**CMWC in BOLD**

**Verse 1:** The words on my tongue they keep knock-ing around  
The door to a song we be-long a-round  
Fol-low-ing roads no u-ni-ty lost  
We be-long to the world and we *hope it can hear us*

**Verse 2:** There are smiles there are tears there are faces in the crowd  
Follow the footprints to our future world  
The sun and the rain (**sun and the rain**) they come down again (**sun and the rain**)  
they belong to the world and we *hope it can hear us*

**Bridge 1:** and i'm not holding on for one more moment to belong

**Chorus 1: We belong to the future, we belong to the past  
Emptiness is gone, heart belongs to the Dawn**

**The fight between the darkness and the light that shines on us  
Makes me feel i'm needed, I hope the world can hear us when we say**

**Verse 3:** Is it safe outside that break in the door (**AH -AH**)  
Makes cherished thoughts (**AH -AH**) be more than what they saw (**AH -AH**)  
A class in the sunlight, (**AH -AH**) a class in the rush (**AH -AH**)  
We belong to the world (**AH -AH, AH -AH**) and we hope it can hear us

**Bridge 2:** And i'm not holding on for one more moment to belong

**Chorus 2: We belong to the future, we belong to the past  
Emptiness is gone, heart belongs to the Dawn**

**The fight between the darkness and the light that shines on us  
Makes me feel i'm needed, I hope the world can hear us when we say**

**Middle: if i can believe I belong** to more than just me  
**Fortunes and friends in the mind**, a family

In a force we can send to the warmth of the sun  
I wanna scream, "I belong  
to more than I (**if i can believe I belong**) know I belonged (**more than I believe I belong**)"

**Build: Let it go on (x4)**

All end up in a place (x4)  
where we belong

**Chorus 3: We belong to the future, we belong to the past  
Emptiness is gone, heart belongs to the Dawn**

**X2**

**The fight between the darkness and the light that shines on us  
Makes me feel i'm needed, I hope the world can hear us when we sing**
