

Go the Distance

for G15 Mass Choir Finale

Grey Italics - SOLOS

Black - All

*I have this choice
though it feels like an addiction
it takes away my fear
When my words just cannot clear
it burns away my past
and I am on fire
Tell me this right now... Would you go the distance?*

From the addiction
I've tried to burn the pages in the fire of my heart
back to the ashes, the people in my mind
start to hurt inside
Tell me this right now... *Would you go the distance?*

*Words cannot explain the things that I desire
With my face to the fire, I can go the distance
But can you go the distance?*

Gimme a reason to remember
Gimme a reason to forget
Gimme a reason, Give me a reason,

Gimme a reason to leave the past now,
Gimme a reason to love again
Gimme a reason, for me to believe you'd go the distance

*With just one voice
We can play into the fiction
Make a childhood disappear
Let the words cross that frontier
Don't turn ablaze too fast
or stare into the shadows
Tell me this right now... Would you go the distance?*

Words cannot explain the things that I desire
With my face to the fire, I can go the distance
But can you go the distance?

Gimme a reason to remember
Gimme a reason to forget
Gimme a reason, Give me a reason,

Gimme a reason to leave the past now,
Gimme a reason to love again
Gimme a reason, for me to believe you'd go the distance

*How far wud'ya, wud'ya go, would'ya,
would you go the distance?*

*How far wud'ya, wud'ya go, would'ya,
would you go the distance?*

How far wud'ya, wud'ya go, would'ya,
would you go the distance?

How far wud'ya, wud'ya go, would'ya,
would you go the distance?

Words cannot explain the things that I desire
With my face to the fire, I can go the distance
But can you go the distance?

Gimme a reason to remember
Gimme a reason to forget
Gimme a reason, Give me a reason,

Gimme a reason to remember
Gimme a reason to forget
Gimme a reason, Give me a reason,

Gimme a reason to leave the past now,
Gimme a reason to love again
Gimme a reason, for me to believe you'd go the distance
